

32ND INTERNATIONAL SUPPLY CHAIN CONFERENCE

October 28-30, 2015

A World in Motion
Eine Welt in Bewegung

Update!

InterContinental/Schweizerhof, Berlin

Preview

A World in Motion

We have suspected since Galileo Galilei, and known since Bernard Léon Foucault, that the world is in motion. But if we look at the world from the perspective of a logistics manager, we have no need of astrophysics, because it is the day-to-day job of logistics managers to keep the world in motion by ensuring constant streams of goods and products. Under the slogan "A World in Motion", we would like you to join us in discussing the trends and developments that keep "our" world in motion and take a closer look at the key stimuli acting on the logistics industry.

Digitalisation is rightly seen as a momentous development, a "game changer". The resulting upheavals for industry and society are so huge that it is difficult to predict what the future holds. From the point of view of logistics and supply chain management, one of the culminations of this development is Industry 4.0. If we are to exploit the potential of Industry 4.0, we must step up the integration of

logistics and IT. At the same time, we also need to seriously engage the issues of IT security and the capacity of our digital infrastructure. Bundesvereinigung Logistik addressed this question last autumn in a widely noted position paper.

But it is not only technology that generates the key stimuli; people are just as important: people like the courageous entrepreneurs who develop new business models or the experienced management personnel who shape the process of change in our companies. At this year's conference, we intend to give a platform to these first movers as well as the young generation of logisticians in industry and academia. We look forward to a cross-sector dialogue with more than 3,000 participants from the fields of industry, trade, services and academia. Share your own expertise and knowledge, and benefit from new ideas and stimuli for your day-to-day work.

Prof. Dr.-Ing. Raimund Klinkner
President,
BVL International,
Managing Partner,
IMX Institute for Manufacturing
Excellence, Martinsried

Welcome to Berlin!

Overview of special-topic sequences

IMPULSE

- Is Industry 4.0 without Alternative?**
Brave New World?
- Start-Up Pitch**
Yes, You Can!
- The Successful Way to New Business Models**
Same Same but Different?
- Award-Winning Research**
A Big Bang Theory?

DYNAMICS

- Volatility and Crises**
Mission Impossible?
- Effective Response to Cyber-Risks**
Wide Wild Web?
- Personnel Strategies for Tomorrow's World**
Talkin' 'bout My Generation!
- Urban Logistics and Infrastructure**
Jam Session?

TURNING MOMENT

- Successful Operational Logistics**
Keep Calm and Carry On.
